Wellbeing

Executive Function

About this report

This report shows your child's results from Rumble's Quest. When children participate in Rumble's Quest they complete fun challenges and answer questions about the way they experience the world.

The questions are grouped into four areas:	The challenges call on the following "executive" skills:
<ul style="list-style-type: none"> - Attachment to School - how children feel about school - Social Confidence - how children feel about themselves and how they relate to others - Self Regulation - how children manage their feelings and actions - Supportive Relationships - how children feel nurtured within secure environments. 	<ul style="list-style-type: none"> - Memory - in the Working Memory game children tap a sequence of squares in the same order they saw them light up - Concentration - in the Inhibitory Control and Flexible Thinking game children use the shape of the objects presented on screen to decide whether or not to tap an object as soon as they see it - Attention - in the Attention and Focus game children search through a screen filled with many shapes to find all the ones that look the same
